

CONTENTS

Dedication	v
Foreword	vii
Preface	ix
Contributors	xv

Part I. Introduction

Chapter 1. Ventricular Repolarization and the Identification of the Sudden Death Candidate: Hype or Hope?	3
<i>Hein J. Wellens and Douglas P. Zipes</i>	
Chapter 2. Historical Milestones of Electrical Signal Recording and Analysis	7
<i>Thorsten Lewalter and Berndt Lüderitz</i>	

Part II. Basic Electrophysiology, Pharmacology, and Molecular Biology of Ventricular Repolarization *Edited by Charles Antzelevitch*

Chapter 3. Physiology and Molecular Biology of Ion Channels Contributing to Ventricular Repolarization	25
<i>Jeanne M. Nerbonne and Robert S. Kass</i>	
Chapter 4. Electrophysiology and Pharmacology of Ventricular Repolarization	63
<i>Charles Antzelevitch, Andrew C. Zygmunt, and Robert Dumaine</i>	
Chapter 5. How Do We Measure Repolarization Inside the Heart?	91
<i>Charles Antzelevitch, Andrew C. Zygmunt, Jeffrey Fish, Guillermo Perez, and Fabiana Scornik</i>	
Chapter 6. Contribution of Electrical Heterogeneity of Repolarization to the ECG	111
<i>Charles Antzelevitch and Vladislav V. Nesterenko</i>	
Chapter 7. Electrical and Structural Remodeling of the Ventricular Myocardium in Disease	127
<i>Antonis A. Armoundas and Gordon F. Tomaselli</i>	
Chapter 8. Ischemia-Related Changes in Repolarization	153
<i>André G. Kléber and Michiel J. Janse</i>	

- Chapter 9. The Long QT Syndrome: Molecular and Genetic Aspects 169
Carlo Napolitano and Silvia G. Priori
- Chapter 10. Ion Channel Disease as a Cause of the Brugada Syndrome:
Molecular and Genetic Aspects 187
Connie R. Bezzina and Arthur A. M. Wilde
- Chapter 11. Cellular and Ionic Mechanisms Underlying Arrhythmogenesis .. 201
Charles Antzelevitch, Alexander Burashnikov, and Jose M. Di Diego

**Part III. Clinical Physiology and Pathophysiology
of Ventricular Repolarization: Theory and Practice**
Edited by Stephen C. Hammill, Win-Kuang Shen, and Ihor Gussak

- Chapter 12. Evaluation of Ventricular Repolarization:
The Clinician's Perspective 255
Jan Němec, Stephen C. Hammill, and Win-Kuang Shen
- Chapter 13. Human Cardiac Repolarization 291
Philip T. Sager
- Chapter 14. QT Interval and Its Drug-Induced Prolongation 311
Wojciech Zareba and Arthur J. Moss
- Chapter 15. Neuro-Mediated Repolarization Abnormalities 329
Philippe Coumel and Pierre Maison-Blanche
- Chapter 16. The Electrophysiologic Matrix: Equilibrium
and Arnsdorf's Paradox 351
Morton F. Arnsdorf
- Chapter 17. Antiarrhythmic Drugs and Future Direction 387
Arshad Jahangir, Andre Terzic, and Win-Kuang Shen

**Part IV. Specific Electrocardiographic Phenomena
and Clinical Syndromes of Ventricular Repolarization**
Edited by Ihor Gussak, Charles Antzelevitch, and Preben Bjerregaard

- Chapter 18. ECG Phenomena of the Early Ventricular Repolarization:
Early Repolarization Syndrome 407
Ihor Gussak, Charles Antzelevitch, and Preben Bjerregaard
- Chapter 19. The Brugada Syndrome 427
*Pedro Brugada, Ramon Brugada, Charles Antzelevitch,
Koonlawee Nademanee, Jeffrey Towbin, and Josep Brugada*
- Chapter 20. Clinical Evaluation, Risk Stratification, and Management
of Congenital Long QT Syndrome 447
Anant Khositseth and Michael J. Ackerman

Chapter 21. Prolonged Repolarization and Sudden Infant Death Syndrome	481
<i>Peter J. Schwartz</i>	
Chapter 22. Short QT Interval: ECG Phenomenon and Clinical Syndrome	497
<i>Ihor Gussak, Charles Antzelevitch, Daniel Goodman, and Preben Bjerregaard</i>	
Chapter 23. T-Wave Alternans: Mechanisms, Relevance, and Clinical Implications	507
<i>Etienne Pruvot and David S. Rosenbaum</i>	
Index	531
