

Contents

<i>Preface</i>	v
<i>Explanatory Notes</i>	vi
a - azurin	1
a - aliesterase	1
alimentary - anuresis	17
anuria - azurin	34
b - bzl	44
c - cytotropic antibody	62
c - cholera toxin	62
cholestane - continuous distribution	80
continuous emission - cytotropic antibody	99
d - dystrophy	116
d - dithioerythritol	116
dithiothreitol - dystrophy	134
e - eye structure	142
e - enhancer	142
enkephalin - eye structure	155
f - fv fragment	168
g - gyromagnetic ratio	189
h - H zone	207
h - high-mutability gene	207
high-performance liquid chromatography - H zone	219

I - IVS	233
I - internal indicator	233
internalization - IVS	247
J - juvenile-onset diabetes	259
k - kynurenine	260
l - lytic virus	266
m - MZE	285
m - micro-	285
microaerophilic - MZE	300
n - nylon	317
o - ozonolysis	332
p - PZI	344
p - phosphaturia	344
phosphine oxide - postprandial	359
postreplication repair - PZI	377
Q - Q value	396
r - R value	398
r - resolving power	398
resolving time - R value	413
s - Szilard-Chalmers reaction	426
s - siderophilin	426
siderophore - standard	442
standard amino acids - Szilard-Chalmers reaction	457
t - tyrosinosis	473
t - trailing	473
trans - tyrosinosis	489

U - UVR	500
v - vFW	506
W - wyosine	516
X - XYZ theory	520
Y - Yphantis method	522
Z - zymurgy	523
