
Contents

<i>Preface</i>	v
<i>Contributors</i>	<i>xi</i>
1. Human Cancer Genetics <i>Jason W. Barlow and David Malkin</i>	1
2. Genetic Toxicity Tests for Predicting Carcinogenicity <i>Errol Zeiger</i>	29
3. Genotoxic and Nongenotoxic Mechanisms of Carcinogenesis <i>Wai Nang Choy</i>	47
4. Structure–Activity Relationship (SAR) and Its Role in Cancer Risk Assessment <i>David Y. Lai and Yin-tak Woo</i>	73
5. Regulatory Genetic Toxicology Tests <i>Wai Nang Choy</i>	93
6. Complementary Genetic Toxicology Assays <i>B. Bhaskar Gollapudi</i>	115

x		Contents
7.	The Mouse Lymphoma Assay (MLA) Using the Microwell Method <i>Masamitsu Honma and Toshio Sofuni</i>	141
8.	The In Vitro Micronucleus Assay <i>Marilyn J. Aardema and Micheline Kirsch-Volders</i>	163
9.	ICH Guidances on Genotoxicity and Carcinogenicity: Scientific Background and Regulatory Practice <i>Lutz Müller, Peter Kasper and Leonard Schechtman</i>	187
10.	New OECD Genetic Toxicology Guidelines and Interpretation of Results <i>Michael C. Cimino</i>	223
11.	Dose–Response Relationships in Chemical Carcinogenesis and Cancer Risk Assessment <i>Werner K. Lutz</i>	249
12.	Molecular Epidemiology and Biomarkers <i>Jia-Sheng Wang, Jonathan M. Links, John D. Groopman</i>	271
13.	Quantitative Cancer Risk Assessment of Nongenotoxic Carcinogens <i>Anna M. Fan and Robert A. Howd</i>	299
14.	Risk Assessment of Genotoxic Carcinogens <i>Lauren Zeise</i>	321
15.	Biologically Based Cancer Risk Assessment Models <i>Suresh H. Moolgavkar</i>	355
	<i>Index</i>	373
