

# TABLE OF CONTENTS

List of Contributors	vii
1. The Hsp90 Chaperone Machinery Acts at Protein Folding Clefts to Regulate Both Signaling Protein Function and Protein Quality Control <i>William B. Pratt, Yoshihiro Morishima and Yoichi Osawa</i>	1
2. Implications of Heat Shock Proteins in Carcinogenesis and Cancer Progression <i>Daniel R. Ciocca, Mariel A. Fanelli, F. Dario Cuello-Carrión and Stuart K. Calderwood</i>	31
3. HSF1: An Emerging Factor in Cancer <i>Stuart K. Calderwood, Md Abdul Khaleque, Ajit Bharti and Daniel R. Ciocca</i>	53
4. Anti-apoptotic, Tumorigenic and Metastatic Potential of Hsp27 (HspB1) and $\alpha$ B-Crystallin (HspB5): Emerging Targets for the Development of New Anti-Cancer Therapeutic Strategies <i>Andre-Patrick Arrigo</i>	73
5. Heat Shock Protein-27 (Hsp-27) in Breast Cancers: Regulation of Expression and Function <i>Vishwanie S. Budhram-Mahadeo and Richard J. Heads</i>	93
6. Role of Heat Shock Protein Hsp25/27 in the Metastatic Spread of Cancer Cells <i>Maria A. Bausero and Alexander Asea</i>	131
7. Heat Shock Chaperone Mortalin and Carcinogenesis <i>Custer C. Deocaris, Sunil C. Kaul and Renu Wadhwa</i>	141
8. Role of Molecular Chaperones in Cell Senescence <i>Michael Y. Sherman and Julia Yaglom</i>	159

9. Involvement of Heat Shock Proteins in Protection of Tumor Cells from Genotoxic Stresses	169
<i>Cornelia O'Callaghan-Sunol and Vladimir L. Gabai</i>	
10. Hsp70 in Tumors: Friend or Foe?	191
<i>Cristina Bonorino and Ana Paula Souza</i>	
11. Hsp70 and Hsp27 as Pharmacological Targets in Apoptosis Modulation for Cancer Therapy	209
<i>M. Brunet, C. Didelot, S. Subramaniam, A.L. Rérole, A. de Thonel and C. Garrido</i>	
12. Heat Shock Protein 90: The Cancer Chaperone	231
<i>Len Neckers</i>	
13. Targeting Hsp90 Function to Treat Cancer: Much More to be Learned	253
<i>Luke Whitesell and Catherine A. McLellan</i>	
14. Small-Molecule HSP90 Inhibitors: Applications in Cancer and Neurodegenerative Diseases	275
<i>Adeela Kamal, Srinivas Kasibhatla, Marco Biamonte, Hong Zhang, Lin Zhang, Karen Lundgren, Marcus F. Boehm and Francis J. Burrows</i>	
15. Drugging the Hsp90 Molecular Chaperone Machine for Cancer Treatment	295
<i>J.L. Holmes, S.Y. Sharp and P. Workman</i>	
16. Cdc37 and Protein Kinase Folding	331
<i>Robert Matts and Avrom J. Caplan</i>	
17. The Elevated Levels of Heat Shock Proteins in Cancer: A Suitable Case for Treatment?	351
<i>Stuart K. Calderwood, Daniel R. Ciocca, Phillip J. Gray Jr, Nava Zaarur, Stan Lepchammer and Michael Y. Sherman</i>	
18. Hsp70-Based Anticancer Vaccines: Chaperoning the Immune Response	367
<i>Jianlin Gong, Jimmy R. Theriault and Stuart K. Calderwood</i>	
19. Piloting of Exogenous Antigen into Cross-Presentation Pathway by Heat Shock Proteins	383
<i>Yasuaki Tamura, Goro Kutomi, Jun Oura, Toshihiko Torigoe and Noriyuki Sato</i>
