Foreword .....	v
Preface .....	vii
Contributors .....	xiii

## Part I Pathophysiology

- 1 The Spectrum of Myocardial Ischemia:  
*The Paradigm of Acute Coronary Syndromes* ..... 3  
*Christopher P. Cannon and Eugene Braunwald*
- 2 Linking Biochemistry, Vascular Biology, and Clinical Events  
in Acute Coronary Syndromes ..... 19  
*Richard C. Becker and Annemarie Armani*
- 3 Triggers of Acute Coronary Syndromes ..... 61  
*Peter M. Sapin and James E. Muller*
- 4 Insights into the Pathophysiology of Acute Ischemia Syndromes  
Using the TIMI Flow Grade, TIMI Frame Count, and TIMI  
Myocardial Perfusion Grade ..... 95  
*C. Michael Gibson, Sabina A. Murphy,  
and Jeffrey J. Popma*

## Part II Diagnosis

- 5 Emergency Department Presentations  
of Acute Cardiac Ischemia ..... 121  
*J. Hector Pope and Harry P. Selker*
- 6 Early Identification and Treatment of Patients  
with Acute Coronary Syndromes ..... 157  
*Mary M. Hand and Costas T. Lambrew*
- 7 Serum Markers for Diagnosis and Risk Stratification  
in Acute Coronary Syndromes ..... 183  
*L. Kristin Newby, W. Brian Gibler, Robert H. Christenson,  
and E. Magnus Ohman*
- 8 Technologies to Diagnose Acute Ischemia ..... 211  
*Robert J. Zalenski, Joseph Lau, and Harry P. Selker*

### Part III ST-Segment Elevation Myocardial Infarction

- |    |                                                                                                                                           |     |
|----|-------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 9  | Thrombolytic Therapy .....                                                                                                                | 237 |
|    | <i>Jeffrey L. Anderson and James S. Zabrack</i>                                                                                           |     |
| 10 | Primary Angioplasty .....                                                                                                                 | 281 |
|    | <i>Sorin J. Brener and Eric J. Topol</i>                                                                                                  |     |
| 11 | Expanding the Access to Percutaneous Coronary Intervention<br>for Patients Admitted to Community Hospitals .....                          | 315 |
|    | <i>Thomas P. Wharton, Jr. and Nancy Sinclair McNamara</i>                                                                                 |     |
| 12 | Antiplatelet and Anticoagulant Therapy .....                                                                                              | 333 |
|    | <i>Marc S. Sabatine and Ik-Kyung Jang</i>                                                                                                 |     |
| 13 | $\beta$ -Adrenergic Blockers, Calcium Channel Blockers,<br>and Nitrates .....                                                             | 377 |
|    | <i>Yerem Yeghiazarians and Peter H. Stone</i>                                                                                             |     |
| 14 | Angiotensin Converting Enzyme Inhibitors After<br>and During Acute Coronary Syndromes,<br>and, in Particular, Myocardial Infarction ..... | 399 |
|    | <i>Rodolfo Carrillo-Jimenez, Charles H. Hennekens,<br/>and Gervasio A. Lamas</i>                                                          |     |
| 15 | Risk Stratification: <i>Exercise Testing, Imaging,<br/>and Cardiac Catheterization</i> .....                                              | 425 |
|    | <i>Sanjeev Puri, Hani A. Razek, and Bernard R. Chaitman</i>                                                                               |     |

### Part IV Non-ST-Segment Elevation Myocardial Infarction

- |    |                                                                                   |     |
|----|-----------------------------------------------------------------------------------|-----|
| 16 | Anticoagulant Therapies .....                                                     | 459 |
|    | <i>Marc Cohen</i>                                                                 |     |
| 17 | Antiplatelet Therapy .....                                                        | 481 |
|    | <i>Ian Conde-Pozzi and Neal S. Kleiman</i>                                        |     |
| 18 | Thrombolytics and Invasive vs Conservative<br>Strategies in Unstable Angina ..... | 519 |
|    | <i>Ali Moustapha and H. Vernon Anderson</i>                                       |     |
| 19 | Current Device Strategies in the Management<br>of Acute Coronary Syndromes .....  | 535 |
|    | <i>Kanwar P. Singh and C. Michael Gibson</i>                                      |     |

### Part V Special Aspects of Acute Coronary Syndromes

- |    |                                                 |     |
|----|-------------------------------------------------|-----|
| 20 | Women and Acute Coronary Syndromes .....        | 569 |
|    | <i>Jane A. Leopold and Alice K. Jacobs</i>      |     |
| 21 | The Modern Strategy for Cardiogenic Shock ..... | 603 |
|    | <i>Gary E. Lane and David R. Holmes, Jr.</i>    |     |

---

22	Myocardial Infarction in the Younger Patient .....	653
	<i>James C. Fang and Jorge Plutzky</i>	
23	Cholesterol Lowering .....	667
	<i>Terje R. Pedersen and Serena Tonstad</i>	
24	“Secondary Prevention” of Myocardial Infarction .....	695
	<i>Jorge Plutzky and Roger S. Blumenthal</i>	
25	Cost and Cost-Effectiveness in Acute Coronary Syndromes .....	705
	<i>William S. Weintraub</i>	
26	Smoking Cessation.....	725
	<i>Beth C. Bock and Bruce Becker</i>	
27	Critical Pathways for Acute Coronary Syndromes .....	745
	<i>Christopher P. Cannon and Patrick T. O’Gara</i>	
	Index .....	763
