

CONTENTS

Preface	v
Contributors	xi
PART I. BASIC CONCEPTS IN ONCOGENE RESEARCH	
1 Genetic Basis of Cancer Progression	3
<i>Susan J. Done and Jeremy A. Squire</i>	
2 The Molecular Basis of Chromosomal Instability in Human Cancer Cells	19
<i>Daniel P. Cahill</i>	
3 Signal Transduction Networks: <i>Ras as a Paradigm</i>	35
<i>Frank McCormick</i>	
4 Oncogenic Receptor Tyrosine Kinases	47
<i>Mark H. Kirschbaum, Mina D. Marmor, and Yosef Yarden</i>	
5 Ras-Mediated Deregulation of Gene Expression and Contribution to Oncogenesis	77
<i>Gretchen A. Murphy and Channing J. Der</i>	
6 The Interplay Between Tumor Suppressor Genes and Oncogenes in Tumorigenesis	101
<i>Eric C. Holland</i>	
7 Genetic Basis of Altered Responsiveness of Cancer Cells to Their Microenvironment	113
<i>Amato J. Giaccia</i>	
PART II. THE FUNCTIONAL IMPACT OF ONCOGENE EXPRESSION ON CANCER CELLS— THERAPEUTIC IMPLICATIONS	
8 Deregulation of Cell Cycle Progression by Oncogenic Transformation	133
<i>Marcelo L. Rodriguez-Puebla, Adrian M. Senderowicz, and Claudio J. Conti</i>	
9 Oncogenes as Regulators of Cell Survival: <i>The Role of Oncogenes and Tumor Suppressor Genes in the Induction of Resistance to Anoikis and Hypoxia</i>	153
<i>Kirill Rosen and Jorge Filmus</i>	
10 Oncogenes and Tumor Angiogenesis	171
<i>Janusz Rak and Robert S. Kerbel</i>	
11 Oncogenes as Therapeutic Targets to Prevent Metastasis	219
<i>Ann F. Chambers and Hemanth J. Varghese</i>	
12 The Impact of Oncogenes on Tumor Maintenance	229
<i>Senji Shirasawa and Takehiko Sasazuki</i>	

13	Primary and Secondary Events in Oncogene-Driven Tumor Development: <i>Lessons from Transgenic Model Systems</i>	245
	<i>Michaela Herzig and Gerhard Christofori</i>	
PART III. ONCOGENES AS TARGETS FOR ANTICANCER THERAPY IN VIVO		
14	Targeting Oncogenes in Hematopoietic Malignancies	297
	<i>Michael E. O'Dwyer and Brian J. Druker</i>	
15	Clinical Evaluation of Agents Targeting Epidermal Growth Factor Receptor (EGFR) in Cancer	313
	<i>Edward H. Lin and James L. Abbruzzese</i>	
16	Inhibition of the HER-2/neu Oncogene: <i>A Translational Research Model for the Development of Future Targeted Therapies</i>	331
	<i>Gottfried E. Konecny, Jane Arboleda, Dennis J. Slamon, and Mark Pegram</i>	
17	Farnesyltransferase Inhibitors as Anticancer Agents	353
	<i>Adrienne D. Cox</i>	
18	Targeting Oncogenic Signaling Pathways in Human Astrocytomas	363
	<i>Gelareh Zadeh and Abhijit Guha</i>	
19	Targeting Oncogenes in Pediatric Malignancies	383
	<i>Giannoula Klement and Robert S. Kerbel</i>	
20	Inhibiting Signal Transduction as an Approach to Radiosensitizing Tumor Cells	409
	<i>Eric J. Bernhard, Anjali K. Gupta, Elizabeth Cohen-Jonathan, Ruth J. Muschel, Stephen M. Hahn, and W. Gillies McKenna</i>	
21	Oncogenes as Targets for Cancer Vaccines	433
	<i>Samir N. Khleif and Joseph A. Lucci, III</i>	
22	<i>Bcl-2</i> Antisense Oligonucleotides Therapy for Cancer: <i>Targeting the Mitochondria</i>	453
	<i>Finbarr E. Cotter and Dean A. Fennell</i>	
Index	469
