

# CONTENTS

Preface	vii
Acknowledgments	ix
Introduction	xi
<b>1</b> <i>Stem Cells Are Not All Equal</i>	<b>1</b>
The Mammalian Embryo	3
Embryonic Stem Cells	5
Adult Stem Cells	9
Stem Cells in Culture	11
Stem Cell Markers	14
<b>2</b> <i>Human Stem Cells</i>	<b>18</b>
Collecting Human Embryonic Stem Cells	18
Fate of the Donor Embryo	23
Directed Differentiation	24
Growth Factors	28
Future Prospects for Adult Stem Cells	30
<b>3</b> <i>Medical Applications</i>	<b>34</b>
Leukemia	36
Immune Deficiencies	38
Diabetes	40
Liver Disease	41
Cardiovascular Disease	43
Neurological Disorders	43
Organ Factories	49

<b>4</b>	<b><i>Commercialization of Human Stem Cells</i></b>	<b>57</b>
	The Stock Market	51
	Aastrom Biosciences Inc.	54
	StemCells Inc.	55
	Geron Corporation	56
<b>5</b>	<b><i>Reality Check</i></b>	<b>58</b>
	The Problem of Immune Rejection	59
	Spontaneous In Vitro Differentiation	64
	Wandering Stem Cells	65
	Stem Cell Cancer Induction	65
	Growing Organs from Cultured Stem Cells	66
<b>6</b>	<b><i>The Ethics of Stem Cell Research</i></b>	<b>72</b>
	Justice and Beneficence	72
	High-Tech Cannibalism	74
	On Becoming Human	75
	The Early Embryo	76
<b>7</b>	<b><i>Legal Issues</i></b>	<b>81</b>
	The United Kingdom	81
	The European Union	84
	The United States	85
<b>8</b>	<b><i>Resource Center</i></b>	<b>88</b>
	Eukaryote Cell Primer	88
	Recombinant DNA Primer	108
	Gene Therapy Primer	120
	The Belmont Report	123
	The Gelsinger Investigation	126
	Clinical Trials	128
	Glossary	131
	Further Reading	157
	Index	163
