
CONTENTS

Preface	v
Contributors	ix
I Basic Considerations	
1 Basic Electronics in Clinical Neurophysiology	3
<i>Christopher M. Sinclair, Mason C. Gasper, and Andrew S. Blum</i>	
2 Basic Neurophysiology and the Cortical Basis of EEG	19
<i>Gregory L. Holmes and Roustem Khazipov</i>	
3 Ions, Membrane Potentials, and Myelin	35
<i>Devanand Jillapalli and Jeremy M. Shefner</i>	
4 Introduction to Volume Conduction	43
<i>Seward B. Rutkove</i>	
II Electroencephalography	
5 The Normal EEG in an Adult	57
<i>Donald L. Schomer</i>	
6 Activation of the EEG	73
<i>Barbara A. Dworetzky, Edward B. Bromfield, and Nanon E. Winslow</i>	
7 Normal Variant EEG Patterns	83
<i>Richard L. Cervone and Andrew S. Blum</i>	
8 Epileptiform Abnormalities	101
<i>Bernard S. Chang and Frank W. Drislane</i>	
9 Focal and Generalized Slowing, Coma, and Brain Death	127
<i>Edward M. Donnelly and Andrew S. Blum</i>	
10 Normal Pediatric EEG	141
<i>Ann M. Bergin and Blaise F. D. Bourgeois</i>	
11 Pediatric EEG Abnormalities	179
<i>James J. Riviello, Jr.</i>	
III Nerve Conduction Studies and Electromyography	
12 Neurophysiology of Nerve Conduction Studies	207
<i>James B. Caress, Gregory J. Esper, and Seward B. Rutkove</i>	
13 Technical, Physiological, and Anatomic Considerations in Nerve Conduction Studies	217
<i>James B. Caress</i>	

14	Introduction to the Needle Electrode Examination	229
	<i>Gregory J. Esper and Seward B. Rutkove</i>	
15	Mononeuropathies of the Upper and Lower Extremity	251
	<i>Kevin R. Scott and Milind J. Kothari</i>	
16	Electrophysiology of Polyneuropathy	275
	<i>Annabel K. Wang and Seward B. Rutkove</i>	
17	Radiculopathy and Motor Neuron Disorders	289
	<i>Juan A. Acosta and Elizabeth M. Raynor</i>	
18	Electrophysiology of Brachial and Lumbosacral Plexopathies	299
	<i>Juan A. Acosta and Elizabeth M. Raynor</i>	
19	Evaluation of the Cranial Nerves	313
	<i>George Sachs</i>	
20	Electrophysiology of Myopathy: <i>Approach to the Patient</i> <i>With Myopathy in the EMG Laboratory</i>	325
	<i>Nithi S. Anand and David Chad</i>	
21	Neurophysiology of Neuromuscular Transmission and Its Disorders	353
	<i>James M. Gilchrist</i>	
22	Pediatric Nerve Conduction Studies and EMG	369
	<i>Peter B. Kang</i>	
IV Autonomic Testing, Evoked Potentials, and Sleep		
23	Polysomnography and Sleep Disorders	393
	<i>Jean K. Matheson, Randip Singh, and Andreja Packard</i>	
24	Autonomic Nervous System Testing	447
	<i>Frederick K. Nahm and Roy Freeman</i>	
25	Visual Evoked Potentials	461
	<i>Frank W. Drislane</i>	
26	Brainstem Auditory Evoked Potentials	475
	<i>Jacob R. Berger and Andrew S. Blum</i>	
27	Somatosensory Evoked Potentials	485
	<i>Jacob R. Berger and Andrew S. Blum</i>	
28	Transcranial Magnetic Stimulation	499
	<i>Masahito Kobayashi and Alvaro Pascual-Leone</i>	
	Index	517
