About the Editor

Preface

## Section I The History

Chapter 01 Transcription: The Never Ending Story 3

## Section II The Machinery

- Chapter 02 The General Transcription Machinery and Preinitiation Complex Formation 21
- Chapter 03 The Dynamic Association of RNA Polymerase II with Initiation, Elongation, and RNA Processing Factors during the Transcription Cycle 49
- Chapter 04 General Cofactors: TFIID, Mediator and USA 67
- Chapter 05 Chromatin and Regulation of Gene Expression 95
- Chapter 06 HATs and HDACs III
- Chapter 07 Structure and Function of Core Promoter Elements in RNA Polymerase II Transcription 135

## Section III The Regulators

- Chapter 08 Transcriptional Activators and Activation Mechanisms 147
- Chapter 09 Transcriptional Repressors and Repression Mechanisms 159
- Chapter 10 STATs in Cytokine-mediated Transcriptional Regulation 175
- Chapter 11 Transcriptional Regulation by Smads 185
- Chapter 12 The Rb and E2F Families of Proteins 207
- Chapter 13 c-Jun: A Complex Tale of a Simple Transcription Factor 219
- Chapter 14 HIV Tat and the Control of Transcriptional Elongation 239
- Chapter 15 Post-translational Modifications of the p53 Transcription Factor 257
- Chapter 16 Actions of Nuclear Receptors 273
- Chapter 17 NFAT and MEF2, Two Families of Calcium-dependent Transcription Regulators 293
- Chapter 18 Hox Genes 309
- Chapter 19 Nuclear Factor-kappa B 321
- Chapter 20 The ATF Transcription Factors in Cellular Adaptive Responses 329

## Section IV The Genome

- Chapter 21 Function and Mechanism of Chromatin Boundaries 343
- Chapter 22 Heterochromatin and X Inactivation 365
- Chapter 23 DNA Methylation Regulates Genomic Imprinting, X Inactivation, and Gene Expression during Mammalian Development 377
- Chapter 24 Comparative Genomics of Tissue Specific Gene Expression 393
- Chapter 25 Transcription and Genomic Integrity 409
- Chapter 26 Cell Death and Transcription 431

**Section V Special Topics**

Chapter 27	Pre-mRNA Splicing in Eukaryotic Cells	<b>447</b>
Chapter 28	Genome Organization: The Effects of Transcription-driven DNA Supercoiling on Gene Expression Regulation	<b>469</b>
Chapter 29	The Biogenesis and Function of MicroRNAs	<b>481</b>
Chapter 30	Transcription Factor Dynamics	<b>493</b>
Chapter 31	Actin, Actin-Related Proteins and Actin-Binding Proteins in Transcriptional Control	<b>503</b>
Chapter 32	Wnt Signaling and Transcriptional Regulation	<b>519</b>
Chapter 33	Regulatory Mechanisms for Floral Organ Identity Specification in <i>Arabidopsis thaliana</i>	<b>533</b>
Chapter 34	Transcription Control in Bacteria	<b>549</b>
Chapter 35	Gene Therapy: Back to the Basics	<b>565</b>
