Mechanisms of Exogenous Antigen Presentation by MHC Class I Molecules *in Vitro* and *in Vivo*: Implications for Generating CD8⁺ T Cell Responses to Infectious Agents, Tumors, Transplants, and Vaccines

JONATHAN W. YEWDELL, CHRISTOPHER C. NORBURY, AND JACK R. BENNINK

I. Introduction	1
II. Supporting Information	4
III. Processing and Presentation of Exogenous Antigens: Reviewing the Recent Literature	26
IV. Conclusion: Basic Questions	63
References	64

Signal Transduction Pathways That Regulate the Fate of B Lymphocytes

ANDREW CRAXTON, KEVIN OTIPOBY, AIMIN JIANG, AND EDWARD A. CLARK

I. Introduction	79
II. B Cell Antigen Receptor Complex	89
III. Coreceptor Regulation of BCR Signaling	106
IV. Regulation of BCR-Induced Responses by CD40	122
V. CD95/Fas-Mediated Signaling and BCR-Mediated Resistance to CD95/Fas-Induced Death	132
VI. General Comments and Concluding Remarks	134
References	135

Oral Tolerance: Mechanisms and Therapeutic Applications

ANA FARIA AND HOWARD L. WEINER

I. Introduction	153
II. Mechanisms of Oral Tolerance	158
III. Immune Functions Affected by Oral Tolerance	174
IV. Factors Affecting Oral Tolerance Induction and Maintenance	178

V. Modulation of Oral Tolerance	201
VI. Nasal Tolerance	203
VII. Other Forms of Antigen-Driven Tolerance	206
VIII. Treatment of Autoimmune and Inflammatory Diseases in Animals	208
IX. Treatment of Autoimmune Diseases in Humans	225
X. Future Directions	232
References	232

Caspases and Cytokines: Roles in Inflammation and Autoimmunity

JOHN C. REED

I. Introduction	265
II. The Caspase Family	265
III. Caspases and Cytokines	267
IV. Conclusions	287
References	287

T Cell Dynamics in HIV-1 Infection

DAWN R. CLARK, ROB J. DE BOER, KATJA C. WOLTERS, AND FRANK MIEDEMA

I. Introduction	301
II. Normal T Cell Renewal from Progenitors	303
III. T Cell Renewal from Progenitors in HIV-1 Infection	305
IV. Getting Quantitative on CD4 ⁺ T Cell Production	309
V. Measuring Cell Division with the Ki67 mAb	316
VI. What Is the Cause of CD4 ⁺ T Cell Depletion in HIV-1 Infection?	320
VII. Appendix: Summarizing in Terms of a Mathematical Model	323
References	324

Bacterial CpG DNA Activates Immune Cells to Signal Infectious Danger

HERMANN WAGNER

I. Introduction	329
II. Bacterial DNA and CpG Motifs: History of Unraveling Immunobiology	331
III. Binding and Cellular Uptake of ODNs	333
IV. Sequence-Independent Effects of the Backbone	333
V. CpG DNA Sequence-Specific Effects on B Cells	334
VI. CpG DNA Sequence-Specific Effects on APCs	336
VII. CpG DNA Effects on T Cells	338
VIII. CpG[S]ODN Effects on NK Cells	339
IX. CpG Motifs Affect Plasmid DNA Biology in Gene Vaccination	340
X. Sequence-Specific Effects of Poly(G) Motifs	341
XI. Immunosuppressive CpG DNA Motifs	342
XII. CpG-ODN-Mediated Signaling	342

XIII. Sensing of Pathogen DNA: Evolutionary Vestige of Foreign DNA	346
XIV. CpG DNA Acts as Adjuvant for Th1 Responses	348
XV. CpG DNA Mediates Harmful Effects <i>in Vivo</i>	349
XVI. CpG DNA Acts as Adjuvant for Antitumor Responses	349
XVII. CpG DNA Reverts Th2-Oriented Pathology	350
XVIII. CpG DNA Acts as Adjuvant for Mucosal Immunity	351
XIX. CpG DNA Causes Extramedullary Hematopoiesis	351
XX. CpG DNA Activates Human Immune Cells	352
XXI. CpG DNA Mediates Signaling: Stimulation versus Costimulation	352
XXII. CpG DNA Allows MHC Class I-Restricted CTL Responses to Exogenous Antigens	353
XXIII. Concluding Remarks	355
References	356

Neutrophil-Derived Proteins: Selling Cytokines by the Pound

MARCO ANTONIO CASSATELLA

I. Introduction	369
II. General Features of Cytokine Production by Neutrophils	369
III. Production of Specific Cytokines by Neutrophils <i>in Vitro</i>	373
IV. Production of Cytokines by Neutrophils Isolated from Individuals Affected by Different Pathologies	426
V. Modulation of Cytokine Production in Human Neutrophils	440
VI. Molecular Regulation of Cytokine Production in Neutrophils	447
VII. Cytokine Production by Neutrophils <i>in Vivo</i>	453
VIII. Concluding Remarks	476
References	479

Murine Models of Thymic Lymphomas: Premalignant Scenarios Amenable to Prophylactic Therapy

EITAN YEFENOF

I. Introduction	511
II. Immunobiology of the Thymus in Relation to Lymphomagenesis	513
III. Thymic Lymphomas of AKR Mice	514
IV. Prelymphoma Cells in AKR Mice	515
V. Carcinogen-Induced Lymphomas	516
VI. Thymic Lymphomas Induced by Fractionated Irradiation	518
VII. RadLV-Induced Lymphomagenesis	520
VIII. Preventive Therapy of Prelymphoma Mice	525
IX. Concluding Remarks	530
References	531
