# Contents

## **XIII Preface**

*U.R. Markert, Jena*

## **1 The ‘Hatching’ of Reproductive Immunology**

*R. Kinský, Zdar nad Sazavou*

Cytokine Regulation and Signal Transduction in Pregnancy

---

## **3 T Cells in Pregnancy**

*M.-P. Piccinni, Florence*

- 3 Abstract
- 3 Introduction
- 4 Decidual T Cells
- 7 Cumulus Oophorus T Cells
- 8 Conclusion
- 8 Acknowledgments
- 8 References

## **10 Physiological Role of IL-15 and IL-18 at the Maternal-Fetal Interface**

*G. Laskarin, N. Strbo, T. Bogovic Crncic, K. Juretic, Rijeka; N. Ledee Bataille, G. Chaouat, Clamart; D. Rukavina, Rijeka*

- 10 Abstract
- 10 Interleukin 15
- 10 Distribution of IL-15 and IL-15R at the Maternal-Fetal Interface
- 12 Influence of IL-15 on Cytokine Production

13	Influence of IL-15 on Cytolytic Potential
14	Biological Significance of IL-15 at the Maternal-Fetal Interface
15	Interleukin-18
15	Distribution of IL-18 and IL-18R Expression at the Maternal-Fetal Interface
16	Role of IL-18 on Cytokine Production
17	Role of IL-18 on the Cytolytic Potential
18	Biological Significance of IL-18 at the Maternal-Fetal Interface
19	Conclusions
19	Acknowledgments
19	References

## **26 The Possible Role of the JAK/STAT Pathway in Lymphocytes at the Fetomaternal Interface**

*T.G. Poehlmann, S. Busch, B. Mussil, H. Winzer, J. Weinert, I. Mebes, A. Schaumann, J.S. Fitzgerald, U.R. Markert, Jena*

26	Abstract
26	Introduction
26	Lymphocytes at the Fetomaternal Interface
27	The JAK/STAT Pathway
27	Cytokines and Growth Factors in the Decidua with Capacity to Use the JAK/STAT Pathway
28	Signaling in T Cells
28	IL-4-Induced Signaling
29	IL-13-Induced Signaling
29	IL-10-Family-Induced Signaling
29	IL-12-Induced Signaling
29	IL-2-Induced Signaling
30	IFN- $\alpha/\beta$ - and IFN- $\gamma$ -Induced Signaling
30	Suppressors of Cytokine Signaling
31	JAK/STAT Signaling in NK Cells
32	Conclusion
32	Acknowledgment
32	References

## **36 Tolerance Signaling Molecules**

*D.A. Clark, Hamilton*

36	Abstract
36	Introduction
37	Tolerance Concepts
40	CD200-CD200R Interaction
42	What about Atypical Class I-b Molecules such as HLA-G and HLA-E?
43	What about Apoptosis-Inducing Molecules?
44	What about IDO?
45	References

## **49 Immunology of Preeclampsia**

*L. Matthiesen, G. Berg, J. Ernerudh, C. Ekerfelt, Y. Jonsson, Linköping;  
S. Sharma, Providence, R.I.*

- 49 Abstract
- 49 Introduction
- 50 Clinical Preeclampsia
- 50 Trophoblast Invasion
- 52 Balancing Act between Inflammatory and Anti-Inflammatory Immune Responses
- 54 Cytokines and Preeclampsia
  - 54 Transforming Growth Factor- $\beta$
  - 54 Tumour Necrosis Factor- $\alpha$
  - 55 Interferon- $\gamma$
  - 55 IL-10
  - 55 Other Cytokines
- 56 Maternal-Fetal Interactions
- 56 Apoptosis and Syncytial Knots
- 57 Free Radicals
- 58 Lymphocyte Populations in Blood
- 58 Toxic Substances of Preeclampsia
- 59 Conclusion
- 59 Acknowledgment
- 59 References

## **62 TNF- $\alpha$ -Mediated Stress-Induced Early Pregnancy Loss: A Possible Role of Leukemia Inhibitory Factor**

*A. Torchinsky, Tel Aviv; U.R. Markert, Jena; V. Toder, Tel Aviv*

- 62 Abstract
- 62 Introduction
- 63 TNF- $\alpha$  as an Inducer of Embryonic Death
- 65 The Blastocyst and Uterus as Targets for TNF- $\alpha$
- 66 Signaling between TNF- $\alpha$  and LIF
- 68 Conclusion
- 69 Acknowledgment
- 69 References

---

Antigen Presentation, HLA Expression, NK Cells and Lymphocytes

## **72 HLA Class I/NK Cell Receptor Interaction in Early Human Decidua basalis: Possible Functional Consequences**

*M. Rabot, J. Tabiasco, B. Polgar, M. Aguerre-Girr, A. Berrebi, Toulouse;  
A. Bensussan, Créteil; N. Strbo, D. Rukavina, Rijeka; P. Le Bouteiller, Toulouse*

- 72 Abstract
- 72 Introduction
- 73 Unique Subsets of dNK Cells
- 74 Unique HLA Class I Expression of Fetal-Derived Invading Extravillous Cytotrophoblast

- 75 A Number of dNK Cell Receptors May Interact with Extravillous Trophoblast HLA Class I Molecules
- 77 Distinct Functions for dNK Cells in Pregnancy?
- 78 dNK Cells Are Very Unlikely to Play a Role in Cytotoxicity
- 78 dNK Cells Do Produce Cytokines
- 79 Conclusion
- 80 Acknowledgments
- 80 References

#### **84 The Significance of the Women's Repertoire of Natural Killer Cell Receptors in the Maintenance of Pregnancy**

*M. Varla-Leftherioti, Athens*

- 84 Abstract
- 84 Introduction
- 85 Biology of NK Cells and NK Cell Receptors
- 86 Implication of NKR-HLA Interactions in Pregnancy
- 87 Implication of NKR-HLA Interactions in Abortion
- 89 Importance of the inhKIR/HLA-C Interactions
- 91 References

#### **96 Antigen-Presenting Cells in the Decidua**

*U. Kämmerer, Würzburg*

- 96 Abstract
- 96 Antigen-Presenting Cells in General
- 97 Dendritic Cells
- 99 Macrophages
- 99 APC in Decidua
- 102 The Functional Role of Decidual APC
- 103 References

#### **105 Regulation of Leukocyte Recruitment to the Murine Maternal/Fetal Interface**

*U. Fernekorn, A. Kruse, Lübeck*

- 105 Abstract
- 105 Introduction
- 107 The Mechanisms of Leukocyte Extravasation
- 108 Leukocyte-Vascular Homing Interactions at the Maternal/Fetal Interface during the Critical Period of Initial Placenta Development
- 111 Leukocyte-Vascular Homing Interactions at the Maternal/Fetal Interface from Midgestation to Term
- 113 Chemokines at the Maternal/Fetal Interface
- 114 References

**118 Progesterone-Dependent Immunomodulation**

*J. Szekeres-Bartho, B. Polgar, N. Kozma, E. Miko, G. Par, L. Szereday,  
A. Barakonyi, T. Palkovics, O. Papp, P. Varga, Peccs*

- 118 Abstract
- 118 Progesterone-Induced Blocking Factor Mediates the Immunological Effects of Progesterone
- 119 Molecular Structure of PIBF
- 119 Biological Effects of PIBF
- 120 Cytokine Effects and Signal Transduction
- 121 PIBF Concentration in Pregnancy Urine Is Related to the Outcome of Pregnancy
- 122 PIBF Exerts an Antiabortive Effect in Mice
- 123 Acknowledgment
- 123 References

**126 Regeneration and Tolerance Factor.**

*A Vacuolar ATPase with Consequences  
R.F. Levine, R. Derks, K. Beaman, North Chicago, Ill.*

- 126 Abstract
- 126 Introduction
- 127 IL-1 Cytokines and Pregnancy
- 127 RTF and Pregnancy
- 128 RTF Is a V-ATPase
- 129 P2X7 Ion Channels
- 129 RTF, Apoptosis and Cellular Activation
- 130 RTF and IL-1 $\beta$
- 132 References

**135 Nerve Growth Factor in Reproductive Biology: Link between the Immune, Endocrine and Nervous System?**

*M. Tometten, S. Blois, P.C. Arck, Berlin*

- 135 Abstract
- 135 Introduction
- 136 Decidualization and NGF
- 138 Neurotrophins and Apoptosis at the Fetomaternal Interface
- 140 Fetal Antigenic Immaturity
- 140 Interactions between Neurotrophins and Progesterone
- 141 Indoleamine 2,3-Dioxygenase Expression and NGF
- 142 Adverse Pregnancy Outcome: Stress and Pregnancy Loss
- 143 Concluding Remarks
- 144 Acknowledgment
- 145 References

**149 The Complement System at the Fetomaternal Interface**

*R. Bulla, F. Bossi, F. Fischetti, F. De Seta, F. Tedesco, Trieste*

- 149 Abstract
- 149 Introduction
- 152 The Complement System
- 153 Deposition of Complement Components on Placentae in  
Physiological Pregnancies
- 154 Regulators of the Complement System in Human Placenta
- 155 Complement Deposition on Placentae in Pathological Pregnancies
- 156 Acknowledgment
- 156 References

**158 Asymmetric Antibodies: A Protective Arm in Pregnancy**

*G. Gutierrez, T. Gentile, S. Miranda, R.A. Margni, Buenos Aires*

- 158 Abstract
- 158 The Role of Asymmetric Antibodies
- 160 Asymmetric Antibodies and Pregnancy
- 161 The Synthesis of Asymmetric Antibodies and the Placenta
- 162 IL-6 and Asymmetric Antibodies
- 164 Intracellular Mechanisms of Asymmetric IgG Glycosylation
- 166 References
- 168 In Loving Memory

Conclusion

---

**169 Lessons from Reproductive Immunology for Other Fields of  
Immunology and Clinical Approaches**

*U.R. Markert, J.S. Fitzgerald, L. Seyfarth, J. Heinzelmann, F. Varosi, S. Voigt,  
E. Schleussner, H.-J. Seewald, Jena*

- 169 Abstract
- 169 Tumor Immunology
  - 170 Immune Escape through Modified Surface Characteristics
  - 170 Immune Modulations via Soluble Substances
  - 170 Invasion
  - 170 Pregnancy-Malignancy Interactions
- 171 Microbiological Immunology
  - 171 Parasites
  - 171 Viruses
  - 172 Pregnancy-Infection Interactions
- 172 Transplantation
  - 172 Rejection Mechanisms
  - 172 Antirejection Therapies

173	Pregnancy-Transplantation Interactions
173	Autoimmune Diseases
173	Loss of Tolerance
173	Immunosuppressive Therapy
174	Pregnancy-Autoimmune Disorder Interactions
174	Allergies
174	The Th2-Prone Immune Response
175	Fetal Programming for Allergies
175	Immunotherapies in Allergy
175	The IDO Concept
175	Pregnancy-Allergy Interactions
176	Concluding Remarks
176	Acknowledgment
176	References
